DIGITAL CAMPAIGNS AND PROJECTS

Each shows my role, audience, channels and results. My outcomes were mostly reach, adoption and participation rather than revenue, and I say so where it matters.

1. UNHCR Global Protection Cluster: Social Media Growth and Digital Platform

- **Objective:** Expand the reach of protection information among humanitarian actors working in conflict-affected operations.
- **My role:** Operating with high autonomy and minimal day-to-day supervision alongside a part-time IT colleague, served as the primary focal point for the GPC's public Drupal platform, social media sites, and digital knowledge base. Communications and Advocacy Intern (September 2022 – May 2023).
- **Audience:** Protection actors across 15 global operations, including conflict-affected contexts, humanitarian partners, and general public.
- **Channels:** LinkedIn, X/Twitter, Drupal website, Mailchimp email newsletters, Trello (planning).
- **What I did:**
    - Managed the website: uploaded 300+ materials, kept the 15 Areas of Focus pages updated and the Protection Risk pages updated quarterly, and archived and built the Global Protection Forum pages for 2018–2023.
    - Integrated a Trello board into the GPC's 2023 social media plan.
    - Designed and sent newsletters, including 3 Human Rights Engagement editions.
    - Created 30+ banners for webinars and sessions, edited 4 campaign videos and laid out reports, guidance and toolkits (Adobe Creative Cloud, Canva).
    - Produced multimedia materials and toolkits for 20+ advocacy campaigns.
- **Success Metrics:**
    - Re-architected and maintained the GPC's public-facing Drupal platform as a centralized hub, ensuring that 15 field operations globally could seamlessly access and share critical protection information in one unified repository.
    - Produced multimedia advocacy materials and digital toolkits supporting 20+ international campaigns.
    - Drove a **109.7% increase in LinkedIn organic followers** and gained 652 new Twitter/X followers within 6 months, generating **124,373+ total social media engagements**.
- **Select Sample Publications (***Handled the design and production of GPC publications, including layout, formatting, editing for presentation and selecting photos from UNHCR's Refugee Media library. The written content came from protection officers and other team members.*)
    - Global Protection Cluster Annual Report
    - Global Protection Thematic Forum Report

2. Local Government Academy: National Online Training and Coaching Series

- **Objective:** Keep local government leaders informed on the national COVID-19 response as the situation changed quickly, and maintain training for newly elected officials.
- **My role:** Project Officer (November 2019 – September 2020). Lead focal point for digital platforms, designing and delivering 5 national asynchronous courses, while serving as Project Lead for 20 live executive coaching sessions. Planned session topics and schedules, coordinated resource speakers and partners, hosted live sessions with open Q&A, and reported on participant feedback.
- **Audience:** 300+ newly elected local officials (online programmes); 500+ local leaders per live session; partners across national agencies, development organizations and academia.
- **Channels:** Online learning platforms, live virtual sessions, partner agency networks for invitations and promotion.
- **Success Metrics:**
    - 3 to 4 sessions per week for about six months
    - 300+ officials per session, 10,000+ cumulative attendances (not unique individuals)
    - 5 online programmes delivered

3. World Meteorological Organization: Intranet Adoption and Engagement Campaign

- **Objective:** Drive staff migration to the new SharePoint intranet while revitalizing and optimizing internal knowledge-sharing networks.
- **My role:** Knowledge & Information Management Support Officer *(Intern May–Nov 2023; Support Officer Nov 2023–Oct 2024)* — Lead focal point for staff adoption campaigns, digital training, and Community-of-Practice analytics. Designed and dispatched targeted Mailchimp email sequences and delivered multi-tiered training sessions tailored to specific department workflows. Conducted a comprehensive engagement audit of the Communities of Practice,retiring inactive networks while launching high-priority thematic groups, and regularly presented campaign performance reports to executive boards.
- **Audience:** All WMO headquarters and regional staff, segmented by department and technical roles, alongside international members across 12 Communities of Practice.
- **Channels:** Segmented Mailchimp email sequences, interactive Microsoft SharePoint portals, multi-platform training webinars, and internal intranet news feeds.
- **Success Metrics:**
    - Achieved **80%+ staff reach** across intranet onboarding and training initiatives (measured by session attendance and active portal logins).
    - Generated a **measurable reduction in IT support tickets** by establishing clear self-service user guidance during the migration.
    - Increased active participation across 12 knowledge-sharing networks by **20%**, establishing a performance baseline during internship and sustaining engagement following network restructuring.

4. UNHCR Global Protection Cluster: Webinars, Forum and Event Support

- **Objective:** Run reliable online and in-person sessions for the protection community.
- **My role:** Communications and Advocacy Intern (September 2022 – May 2023).
- **Audience:** Protection and humanitarian actors worldwide
- **Channels:** Zoom, Microsoft Teams, in-person events, banners and email promotion.
- **What I did:**
    - Provided technical support for all GPC Zoom and Teams webinars and sessions
    - Moderated a session at the Global Protection Forum
    - Supported the Humanitarian Networks and Partnerships Weeks sessions (April 2023)
    - Gave technical and communication support at in-person events
    - Created 30+ banners to promote them

5. Personal Web Platform & Data Portfolio (timothycastillon.com)

- **Objective:** Design, build, and deploy an independent, data-centric web platform to showcase complex international development projects, data analytics frameworks, and documentary visual storytelling.
- **Role:** Sole Designer, Developer, and Content Architect.
- **Audience:** International organizations, hiring panels, data science professionals, and global development stakeholders visiting *timothycastillon.com*.
- **Channels:** Custom HTML5/CSS3, JavaScript, structured JSON data architectures, GitHub Pages hosting, and responsive layout frameworks.
- **What I Did:** Initially launched as an academic capstone project, I expanded and maintained the site as an ongoing digital laboratory at the nexus of my work in climate migration, data science, documentary field photography, and web development. Coded custom frontend layouts and JSON datasets to host interactive project showcases and visual narratives without relying on commercial templates.
- **Success Metrics:**
    - Built and deployed an active, evolving web application hosted via GitHub Pages, maintaining **100% independent site architecture and data integrity**.
    - Successfully integrated multi-disciplinary focus areas, translating research on climate risk and migration alongside visual field photography into an interactive digital user experience.
